

Department of Ecology and Evolutionary Biology

2009 Fall Seminar Series

Date	Speaker	Affiliation	Title	Contact
9/25		NO SEMINAR		
10/02	Todd Oakley	UC Santa Barbara	Let there be light! Evolutionary origins of light sensitivity in animals	Briscoe
10/09	Riccardo Pappa	UC Irvine	Genes show their color: Wing pattern in heliconius butterflies	Reed
10/16	Chris Dupont	J. Craig Venter Institute	The impact of trace metal chemistry on the evolution of life	A Martiny
10/23	Maud Tenaillon	INRA	Tracking adaptive changes in maize	Gaut
10/30	TBA	TBA	TBA	Briscoe
*11/04	Jonathan Eisen	UC Davis	Phylogenomic perspectives on the origin of novelty in microbes	A. Martiny
11/13	Gregory Grether	UC Los Angeles	The evolutionary consequences of interspecific aggression	Briscoe
11/20	Nathaniel Dominy	UC Santa Cruz	Evolution of the human diet	Briscoe
12/04	Jay Storz	UNL	Genetics of Adaptation: Lessons from Deer Mouse Hemoglobins	Briscoe
*12/09	Carlos Bustamante	Stanford University	TBA	Briscoe
12/11		<u>NAS Colloquium on Human Evolution</u>		Awise

Venue: 200 HSLH 2. Time: Fridays at noon (until 1 pm). Contact: Adriana Briscoe (abriscoe@uci.edu).

* Please note that two invited speakers, Jonathan Eisen and Carlos Bustamante are coordinating their visit in conjunction with NAS Symposia and their seminars will be on Wednesday rather than Friday of those weeks.
