

Department of Ecology & Evolutionary Biology

2016 Spring Seminar Series

Natural Sciences 2, Room 4201

Fridays, 3 pm-4pm; followed by a Roof top reception

- | | | |
|------|----|--|
| Apr | 1 | Robert Raguso , Cornell University
“Geographic mosaics of moth Pollination: floral scent, gene flow and forgotten pollinators”
Host: Diane Campbell |
| Apr | 8 | Therese Markow , UCSD and Laboratorio Nacional de la Genomica de Biodiversidad
CINVESTAV-Guanajuato, Mexico
“Levels of Reproductive Isolation in Drosophila”
Host: José Ranz |
| Apr | 15 | Jennifer Lau , Michigan State University
“Species interactions in a changing world: Evolutionary consequences of global change”
Host: Diane Campbell/Kailen Mooney |
| Apr | 22 | Jonah Piovia-Scott , Washington State University
“How do species interactions mediate ecological responses to climate change?”
Host: Kailen Mooney |
| Apr | 29 | Eric Wood , CSULA
“The ecology of bird migration in the face of extreme weather”
Host: Jessica Pratt |
| May | 6 | Carlos Machado , University of Maryland
“Genomics of species divergence in Drosophila”
Host: José Ranz |
| May | 13 | Akito Kawahara , University of Florida
“Anti-Bat Strategies in Moths: Sonar Jamming, Acoustic Deflection, and Visual Lures”
Host: Adriana Briscoe |
| May | 20 | Brett Riddle , University of Nevada
“Diversification in North American aridlands: general patterns, congruence, and pseudocongruence”
Host: Brad Hawkins |
| May | 27 | Caroline Williams , UCB
“Cold adaptation remodels energetics and metabolism in Drosophila melanogaster”
Host: Brad Hawkins |
| June | 3 | Brad Hawkins , UCI
“The biogeography of North American forests from continental to local scales” |
